

INDEPENDENT SCHOOL DISTRICT 719
PRIOR LAKE - SAVAGE AREA SCHOOLS**804 ENERGY EFFICIENCY****I. PURPOSE**

ISD 719 is committed to an energy-conscious environment through energy efficient building operation and behavioral practices. A comfortable learning environment will be maintained and health, safety and security will not be compromised. It is the responsibility of the school district to leadership in developing an energy-efficient culture and support awareness about positive environmental impact and utility cost avoidance opportunities.

II. DEFINITION

We believe all staff and students should learn and practice ways to reduce energy consumption on a daily basis by instilling lifelong habits for energy conservation; therefore, everyone is required to abide by the following energy guidelines and procedures.

III. GENERAL STATEMENT OF POLICY

The School Board and Superintendent authorize the Director of Operations/Transportation to coordinate the energy efficient building operation and behavioral practices for staff and students in accordance with best practices for energy conservation. Such regulations and conservation procedures are intended to result in consistent implementation of energy usage throughout the district.

These guidelines and procedures for energy efficiency are available from the office of the Director of Operations/Transportation and on the Operations tab of the district website.

School Board Adoption: December 10, 2018

An Equal Opportunity School District
